

Manish Pandey

Data Engineer · Spark · PySpark · Azure Databricks · dbt · Airflow · Kafka · SQL · Python · ETL · CDC

Gurugram, India · +91-9140357957 · mp4966@gmail.com · 5 years

SUMMARY

Data Engineer with 5 years of production **ETL/ELT**, **Spark lakehouse**, **CDC / streaming**, and warehouse work. Own **SSC Candidate 360: dbt + Azure Databricks** (Spark / PySpark / Delta / ADLS), orchestrated by **Apache Airflow**, tested in GitLab CI, served on **Apache Superset**. Also production **Kafka** pipelines, **GoldenGate CDC**, **Azure Data Factory** ETL, Spark tuning, and CI/CD.

SKILLS

Apache Spark, **PySpark**, **Spark SQL**, **Spark Structured Streaming**, **Python**, **SQL**, **Azure Databricks**, **Delta Lake**, **Azure**, **ADLS**, **Azure Data Factory**, **dbt**, **Apache Airflow**, **Apache Kafka**, **ETL**, **ELT**, **CDC**, **Data Warehousing**, **Data Modeling**, **Data Pipelines**, **Lakehouse**, **GitLab CI/CD**, **Apache Superset**, **Oracle GoldenGate**, **ODI**, **Git**, **Incremental Load**, **SCD Type 2**, **Star Schema**, **Data Quality**, **Parquet**

Languages Python, SQL, PySpark, Spark SQL, PL/SQL

Lakehouse Azure Databricks, Apache Spark, Delta Lake, ADLS, dbt (bronze/silver/gold, incremental, tests), Apache Superset

Orchestration Apache Airflow (DAGs, retries, SLA, backfill), Azure Data Factory, GitLab CI/CD

Streaming / CDC Apache Kafka (topics, partitions, consumer groups, lag), Spark Structured Streaming, Oracle GoldenGate

Pipelines ETL, ELT, batch + incremental, star schema, SCD Type 2, data quality, lineage, ODI, Oracle, MariaDB

EXPERIENCE

Data Engineer (Consultant)

Apr 2022 – Present · Gurugram

Cubastion Consulting

Production Spark lakehouse, Airflow/ADF orchestration, Kafka + CDC, and warehouse ELT for exam analytics, telecom, automotive.

Staff Service Commission (SSC) — Candidate 360 Data Platform [Current](#) · [dbt](#) · [Airflow](#) · [Databricks](#) · [Spark](#)

- Built production ELT: source → dbt bronze/silver/gold as incremental **Delta/Parquet** on **Azure Databricks** (ADLS, Spark SQL / PySpark).
- Orchestrated daily + catchup runs with **Apache Airflow** DAGs (retries, SLA, sensors, idempotent dbt tasks); GitLab CI/CD runs dbt tests before gold.
- Incremental MERGE (unique_key + lookback) + **SCD Type 2** history; **Candidate 360** star schema (1 grain = 1 candidate, exam stages/status/attempts).
- Apache Superset: 360 profile, stage funnel, DAG/freshness monitoring.

Enterprise ICDB Data Platform — Phase 1 [Spark](#) · [Databricks](#) · [ADF](#) · [CI/CD](#)

- Built ICDB lakehouse tables with **Apache Spark (PySpark / Spark SQL)** + Delta on Databricks; partitioned for prune-friendly reads.
- Tuned production Spark jobs (joins, file sizing, shuffle) via Spark UI / query plans.
- Scheduled Spark/SQL loads on **Azure Data Factory**; promoted objects via GitLab CI/CD with rollback-safe releases; documented lineage.

Enterprise ICDB Data Platform — Phase 2 (Production pipelines) [Kafka](#) · [Streaming](#) · [SLA](#)

- Built production **Apache Kafka** pipelines (topics, keys/partitions, consumer groups) to move events between source and downstream systems under SLA.
- Consumed with **Spark Structured Streaming** (checkpoint, trigger, late data); monitored consumer lag, replay from offset, RCA + runbooks.

Production ETL & Warehouse Support [ADF](#) · [ODI](#) · [SQL](#) · [DQ](#)

- Owned production ETL on **Azure Data Factory** + ODI: SLA tickets, load windows, row-count recon, backtrace bad metrics to joins/filters/source gaps.

Multi-Region Master Data Migration (Wave rollout) [ETL](#) · [Python](#) · [SQL](#)

- Wave-based master-data ETL across regions; SQL/Python reconciliation (counts, keys, attributes) before cutover.

Production CDC & Rollback (Database upgrade) [GoldenGate](#) · [Kafka](#) · [CDC](#)

- Production **CDC: Oracle GoldenGate** (Extract/Replicat, lag, trail, abend) + Data Guard rollback; published changes to **Kafka** for downstream lakehouse MERGE.
- Python extract-diff + Oracle → MariaDB transforms validated in GitLab CI/CD.

EDUCATION

B.Tech, Electronics and Telecommunication Engineering — Chandigarh Engineering College, Chandigarh 2021 · CGPA 7.8/10
